

## About Cedar Bear

Many years ago, Cedar Bear's founder, Carl Robinson, looked at herbs differently than others. As a professional Clinical Herbalist, he loved working with the countless health-supporting plants that nature has provided to help people that came to his clinic with their health needs.

But he saw that so many product companies were trying to make herbs work like drugs, changing their makeup, putting the herbs in pills, creating products they call herbs, but which aren't anything like the plants that they come from! Most liquid herbs (liquid is the best way for the body to use herbs) were made with alcohol, which denatures many of the nutrients and active constituents that are supposed to help us. (And also makes them taste bad!) And then there were the preservatives and additives...

So, Carl created a process that makes great tasting, totally alcohol-free liquid herbs that have all the goodness that nature provided them with. No preservatives are needed. No refrigeration is needed. Carl founded Cedar Bear Liquid Herbs, together with his wife and partner Jhoane, to make these

wonderful health-supporting herbs available to help you with your health! 20 years and counting, and Cedar Bear herbs just keep getting better!

Our manufacturing facility is in Roosevelt, Utah. Inside are our professional and friendly staff who prepare our unique liquid supplement products.
