Emotional Intelligence (EIQ) Inventory

Emotional intelligence is the ability to perceive emotions, to access and generate emotions so as to assist thought, to understand emotions and emotional knowledge, and to reflectively regulate emotions so as to promote emotional and intellectual growth (Mayer & Salovey, 1997).

Research indicates that emotional intelligence can be learned and can be seen as measurable differences directly associated with professional and personal success. Furthermore, it may be responsible for up to 80% of the success we experience in life.

This assessment serves to:

- Heighten awareness of the various areas of emotional intelligence
- Indicate relative strengths and weaknesses
- Provide a framework for personal and professional improvement

"Emotional intelligence counts more than IQ or expertise for determining who excels at a job -- any job. For outstanding leadership, it counts for almost everything." - **Daniel Goleman**

"In leadership positions, 85% of the competencies for success lie in the EI domain, rather than in technical or intellectual abilities." - **Daniel Goleman**

"People typically attribute the lion's share of their success personally and professionally to their mental intelligence, or IQ. Research in psychology and human performance over the last twenty years indicates that mental intelligence does contribute to success BUT the far more significant intelligence that accounts for personal and professional success is emotional intelligence!" - **Michael Rock**

Emotional Intelligence is a way of recognizing, understanding, and choosing how we think, feel, and act.

- It shapes our interactions with others and our understanding of ourselves
- It defines how and what we learn
- It allows us to set priorities
- It determines the majority of our daily actions

How It Works:

EQ is based on an internal loop. It begins with **awareness** of emotions and temperament. It continues on through **understanding** and moves towards **discipline** and **management**. After the initial personal cycle, it **connects** to the emotions of others.

This assessment measures and provides insight into four areas of Emotional Intelligence:

- Self-Recognition
- Self-Management
- Social Recognition
- Social Management

The score below uses each of these areas to provide you with a comprehensive score of Your Overall EIQ:

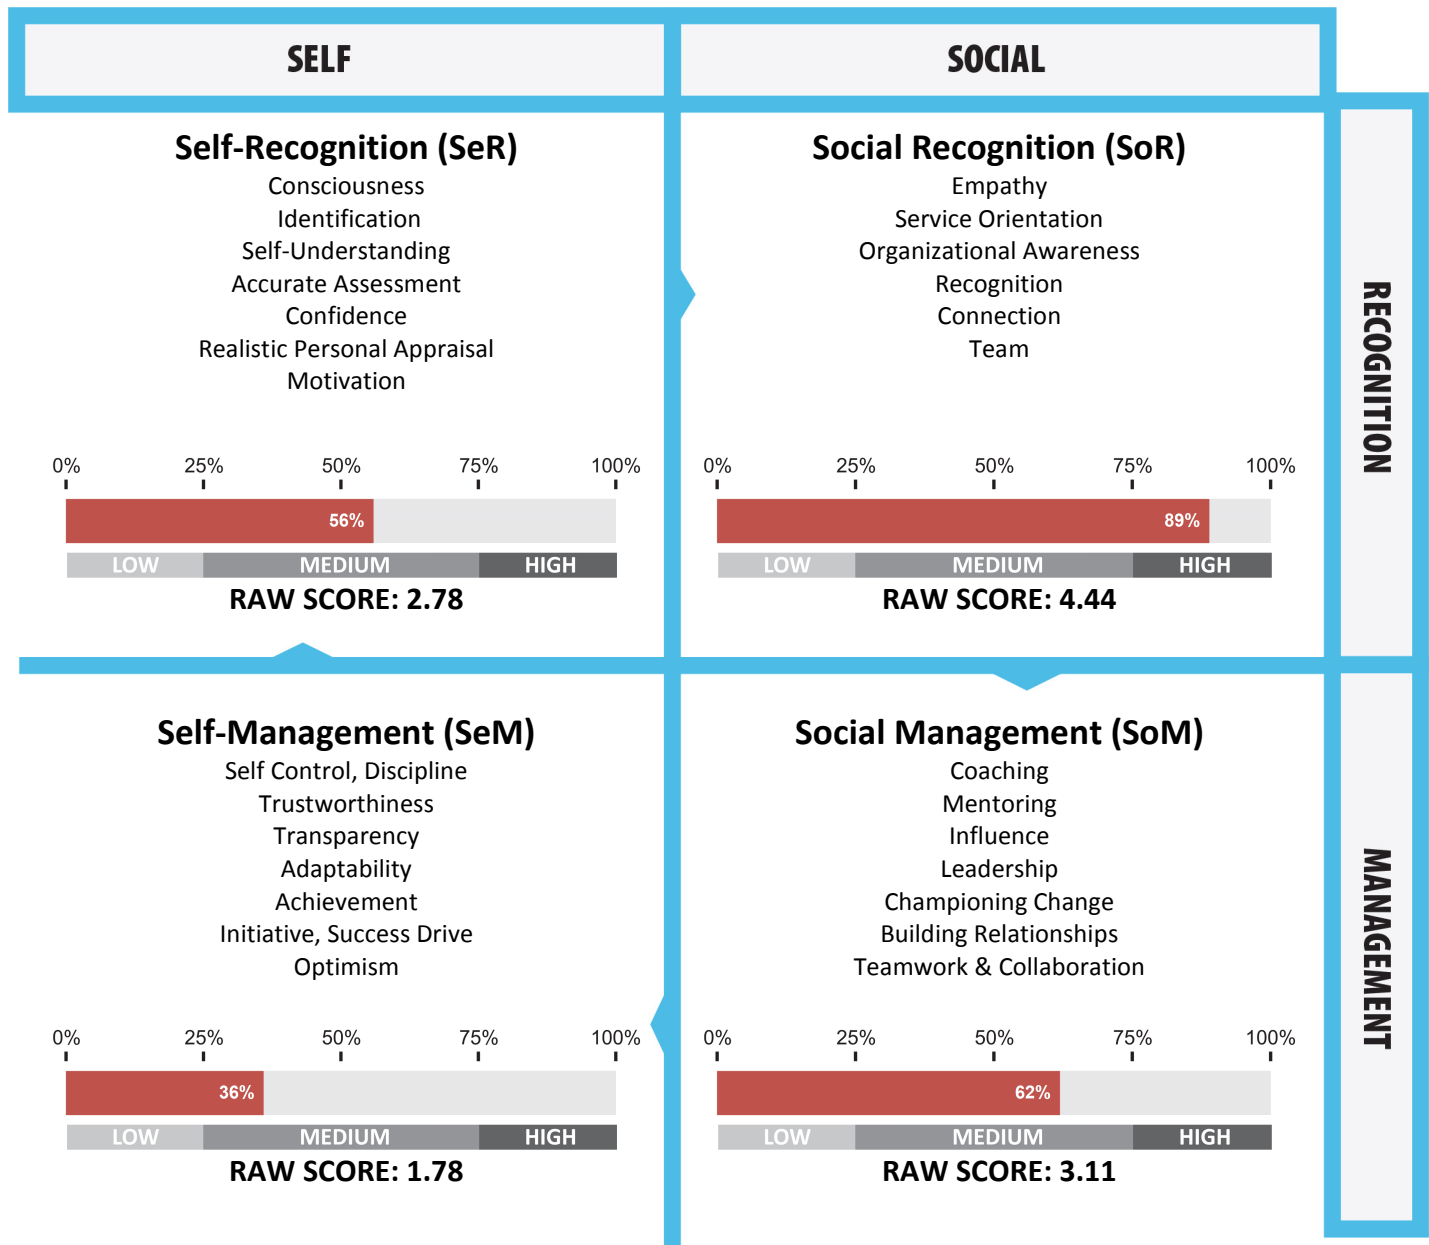

RAW SCORE: 3.03

Note: The Raw Score gives an average based on a scoring range from 1-5

Now What?

"The longest journey on earth begins with a single step." (Ben Sweetland)

After taking this assessment and reading your report, you are probably even more interested in learning as much as possible to improve your emotional intelligence (EIQ). You might believe you can absorb the suggested improvements quickly and retain them until they become second nature, right? Wrong! You must improve your EIQ through ongoing practice. Competence breeds confidence, which leads to inner motivation.

The key to making EIQ easier to master is to break the improvement suggestions into simple bite-size pieces that can be readily digested and successfully implemented in your life. Perfect one area and incorporate that information into your life before perfecting the next area. This begins a "spiral of success" where you learn something new, try it out, and experience some success which gets you charged up about learning more.

The speed with which you apply your new EIQ knowledge should change your behaviors gradually, not radically, so that it affects your life permanently - not as quick fixes learned today and forgotten tomorrow. Training, learning and practicing must become an "all the time" behavior.
