Stock Services Inc  
727 Bennett Rd  
Angola, New York 14006-9742

Dear Sirs,

It is my pleasure to recommend Stock Services, Inc. as your contractor of choice for numerous construction projects and site services work. The quality of their work, expediency and proper execution and conduct are paralleled by few to none in their field. Cradle Beach is fortunate to have such allies that understand the mission of Cradle Beach: to serve, help and guide economically disadvantaged children and those with special needs to grow and help them reach their full potential.

During work on our GEICO Woodland Lodge, I worked with Mr. John Stock and his son, Jeremy, as they prepared the building site and areas for utilities and services. Their cooperative spirit transferred to other work crews on the project making the entire project move smoothly.

A nearly 1200 foot, unforeseen change in plans caused a significant adaption of the electrical power needs as the project developed. Their on-site leadership and ability to rally workers from all fields made this sudden change in plans move along quickly, taking care of the change in just a few short days, keeping the project right on schedule.

Stock Services has also tended to many, much smaller, projects on the Cradle Beach property. Each time, they have taken the time to thoroughly research, explain our options and then safely and quickly complete the job.

And their help goes beyond just physical work. At times I have called either John or Jeremy for advice, or about equipment maintenance and they have taken the time to either thoroughly explain a solution, or in fact, visit to be sure that we were going to get the right information.

It is from their very ethical, professional and safety minded approach that I highly recommend, without hesitation, Stock Services for work on your project. Their quality skills, personable demeanor and overall professional, high quality work will provide for a superb final product.
